Overview

Lavender is an aromatic evergreen shrub, with a multitude of stems rising above hairy green leaves. This plant, also called true lavender, fine lavender, wild lavender or English lavender, has deep roots in Provençal tradition. It grows wild in the region's highlands, particularly in the Alpes de Haute-Provence, on sunny mountain slopes between 600 and 1700 meters. This French region is one of the world's biggest lavender-producing areas.

Its fragrant, intense, blue-purple flowers bloom in summer. The flowering tops are harvested in July and August when the summer heat stimulates the rise of the essence into the flower's secretory glands. The fragrance of Haute-Provence lavender essential oil is agrestic and floral with a herbaceous note.

Properties, benefits & uses

Lavender essential oil is widely used and recommended for its multiple benefits since ancient times. It has powerful healing and anti-infectious properties for the skin and dramatically regenerates it. The fresh, distinct aroma can relax muscles and promote concentration. Lavender Oil is anti-depressive and has calming qualities by regulating the nervous system, making it popular with aromatherapy to help aid sleep. Its benefits can also aid the respiratory tract, the digestive system and soothe itching.

Product Information

Description

Lavender Oil is an aqueous solution of the steam distillate obtained from the flowers of the Lavender, *Lavandula angustifolia*, Labiatae.

INCI

Lavandula Angustifolia
Flower Oil

Origin

France

CAS No.

90063-37-9

EC No.

289-995-2

Grades Available

Certified organic and
conventional
