

WORLÉE
seit 1851

WorleeAqua Thix 100 & 150 are liquid acrylic dispersions designed to thicken, suspend and stabilize products containing low and high levels of surfactants or electrolytes.

As well as acrylic rheology modifiers, **Worlee** offers **WorleeBase** dispersed pigment bases, **WorleeMicromer** film-formers and other ingredients including **Olive Squalane**.

SunChemical
a member of the DFC group

We are delighted to now offer **Sun Chemical's** unbeatable ranges of Pearl Pigment technologies. The ranges include **INTENZA®**, **SunPURO®**, **SPECTRAFLEX®** and **SunSHINE®** synthetic mica pigments with mesmerising and colour travel effects.

CONTIPRO
BIOTECH

Elaself has a positive influence on improvement of elasticity and reduction in wrinkles by 30% in 6 weeks.

Contipro also offers a range of Hyaluronates, including **Hyactive®** low molecular weight hyaluronic acid, plus **Schizophyllan** which has anti-acne effects.

BARNET

"Look 11 years younger in 4 weeks" with **Derm SRC** from **Barnet** Products. This excellent anti-ageing ingredient has strong supporting data. In 2014 **Barnet** also launched **Chloroplastim**, which reduces wrinkles, prolongs moisturisation and acts on clock genes.

Barnet supplies a range of unique active ingredients.

induchem

Redensyl® scooped an In-Cosmetics 2014 award. This breakthrough against hair loss offers a viable alternative to hair transplantation.

Induchem offers a range of high efficacy active ingredients, plus the world famous **Unispheres** and **Unishapes** decorative particle and a selection of film-formers and other functional ingredients.

Oat cosmetics

Oat Lipid e is a unique Oat Oil proven to contain high levels of skin identical lipids, including an amazing 1% (minimum) ceramides. It is the new "must have" natural oil for all skincare products.

Oat Cosmetics also offers **Oat COM** Colloidal Oatmeal with amazing soothing, hydrating and de-greasing benefits plus **Oat Silk**, which is a cost-effective luxurious sensory powder, offering unique and elegant textures.

CODIF R & N

Lakesis, obtained from the crystal drops of the Mastic tree is proven to awaken youth proteins. This novel anti-ageing approach has been strongly received in 2014.

Codif has a vast range of high efficacy active ingredients, many of which have won industry awards. It has extensive in-house testing facilities.

Lipoid Kosmetik

SLM (Skin Lipid Matrix) is a novel formulation base composed of skin identical lipids that can regenerate and reconstruct the skin barrier.

Lipoid offers a vast range of high quality botanical extracts, actives, additives and abrasives. They offer a comprehensive range of **Lecithin** and **Phosphatidylcholine** technologies.

CORUM

Ei-VC™ (Ethyl Ascorbic Acid) is a novel stabilised Vitamin C with superior stability, efficacy and penetration compared to the likes of Ascorbyl Glucoside and Ascorbyl Phosphates. **Corum** offers skincare peptides and other actives, plus warming and cooling agents including **Hotflux™**.

L22® is a patented botanical emollient base which emulates the skin's surface lipids of a healthy 22 year old.

Floratech is famous for their wax bead and natural emollient technologies, including the **Florabeads®** Jojoba beads and **Floraesters®** ranges.

RES PHARMA

The world-renowned **Resplanta®** range of water-soluble vegetal oils now boasts PEG-free grades.

Res Pharma also offers a wide range of novel emollients, emulsifiers, active ingredients, emulsion concentrates and wet wipe technologies.

In 2014 **MPI** launched **Naturescrub™**, a new range of decorative and exfoliating beads based on Carnauba and Montan Wax. They are a natural alternative to microplastic beads.

MPI also offers a range of micronised wax powder technologies.

Snow Algae Powder is based on a unique extract that grows on glaciers. Growing in such conditions results in the algae producing valuable stress response molecules. The In-Cosmetics 2014 award winning ingredient is proven to protect and activate longevity factors in skin cells, rejuvenate, smooth, hydrate and strengthen skin.

Mibelle Biochemistry offers a wide range of active ingredients including the world-renowned **PhytoCellTec™** stem cell technology.
